

## Senses Apple Fresh Toothpaste: 1 x 75ml Tube

- Toothpaste formulated to suit even those with severe oral sensitivities.
- Mild and great tasting, containing the recommended optimum amount of fluoride (1450ppm).
- Low foaming.
- Does not contain SLS (Sodium Lauryl Sulphate), thus avoiding dry mouth.

Senses Apple toothpaste is enjoyed by most people that dislike or are unable to use other toothpastes.

Great for coaxing those reluctant to receive oral care.

Benefits:

- Senses toothpaste actually has a gel-texture that sinks in to the bristles, thus avoiding falling off the brush, ensuring it actually reaches the teeth
- Contains 1450 ppm fluoride, the recommended amount for optimum protection
- Contains no SLS (sodium lauryl sulphate) which can have a drying effect on the mouth
- Non foaming so easier for carers to use
- Flip top lid for ease of use
- Although we've launched Senses toothpaste in a plastic tube, we are planning to switch to an environmentally friendly alternative at the earliest opportunity
